Water District – pinewoodspringswater.org

Happy New Year everyone!

In December we received notice from the health department that we barely exceeded allowable levels of disinfection byproducts. Because of this, we are required by the CDPHE to send our customers a letter. These contaminants are the byproducts of the disinfection process and occur occasionally in every water system with larger storage tank capacities. Our potable water supply comes from the Little Thompson River. Historically, pre 2013 flood, the river stopped flowing every year in about July. The district installed more storage tanks to provide the community with an adequate potable water supply during these times of drought. Before the added tank storage and the building of the raw water reservoir, the district had to haul in water when the river stopped flowing. This was a very costly, time consuming, and inconvenient process. Thankfully, we no longer must haul water, however, we face challenges with long term stored treated water. We are in the process of correcting the cause of these byproducts.

Our next meeting is **January 24th at 7:00 pm**. To be included on the next agenda or to receive a Zoom invite, please call, 303-823-5345, or email pswdadmin@att.net

Our prime concern is care and maintenance of the two Pinewood Springs properties, the Tubs Park and Crescent Lake. We also provide a forum for the residents to discuss problems that occur in the community and provide information concerning Pinewood Springs covenants and Larimer County Land Use Codes.
