Water District – pinewoodspringswater.org

If you have NOT already done so, PLEASE fill out the questionnaire on the back of this newsletter. It is very important that the water district has this information on file.

Have you ever wondered about the hardness of our water? We recently had it tested and on a scale of 0 to 160, with 160 being the hardest, our water tested at 73mg/l, which is considered soft and in the ideal range. Hardness is not a constant number. It depends on several factors. The website address following is a good source for more information on dealing with water hardness. <https://www.energy.gov/energysaver/understanding-and-dealing-hard-water>

Dogs running loose have been an ongoing concern in Pinewood Springs for some years. Loose dogs have attacked other dogs and people, and even killed other dogs. Residents carry various means of protection against loose dog encounters. It's only a matter of time before someone's indifference about their pet, leads to serious consequences. If you love your pets keep them fenced. To report a pet issue, <https://www.larimerhumane.org/animal-control/larimer-county/> or call 970-226-3647, ext. 7, for immediate assistance.

Next meeting is Wednesday, **April 19th, 7:00 pm via Zoom**. For more information, access our website at pinewoodspringsPOA.com.
